Projects Details

Bamrec - A platform to keep Kids Engaged

Team Size: 1 KeySkills: ReactJS, Redux, TypeScript, JavaScript, CSS , Ant Design

Bamrec is an innovative platform that makes it easy for parents and organizers to create cultivate confidence, character and creativity in children. The primary aim of the platform is to offer a healthy environment and heartfelt experiences to the children by participating in various activities. Bamrec is a boon for the parents as well as the organizer to stay on the same page. The platform allows the parents to view the activity based on age criteria.

MwareIPTV - A Flexible TV platform

Team Size: 1 KeySkills: ReactJS, Redux, TypeScript, JavaScript, CSS

MwareIPTV is a compliant TV platform that is specifically built on a multi-tenant cloud middleware TV platform. On top of this, we run our template-based, highly customizable applications. MwareIPTV is a cloud-based video-streaming platform that provides OTT (over-the-top) and IPTV (internet protocol television) middleware solutions to deliver content based on a modular design. Moreover, the platform too supports broadcast and protects video-on-demand and live assets. Moreover, it manages content and streamlines and distributes live videos, enabling clients to easily send transcoded streams to any public, private or hybrid network.

Fanship- A Best Social Media App

Team Size: 1 Industry: Social Media KeySkills: ReactJS, Redux, TypeScript, JavaScript, CSS , MUI, NodeJs, AWS, DynamoDb

Fanship allows users to connect, build communities, and enhance business productivity. In addition, the platform enables business merchants and organisations to perform paid content for advertising their goods and services to customers. The fanship team is not responsible for selling personal information to advertisers. Moreover, they will not share any information that personally identifies the users (For example, name, email address, or other contact information) with advertisers unless you have given us specific permission. The primary goal of this social media app is to build a stronger community globally and make it easy for the customers to grab the service offerings by the business. Generally, this mobile app is available in English, Japanese, and Chinese.
